The Green Feathers app: Compatible with 3rd Gen cameras only.

Extra cameras can be added into the app: You can add as many of our HD cameras to the app as you wish. The only limitation is your network speed! The Green Feathers app is compatible with 3rd Gen cameras only.

Our hedgehog box eco-roof is made of recycled composite materials and is waterproof and rot-proof. The slightly raised footrail at the rear of the house plus additional grooves on the top of the side panels assist drainage and airflow towards the entrance. The lid is hinged and lockable and ventilation is provided by a narrow gap under the front edge of the roof overhang.
